

2000 Pool Equipment Record v2 Corrected

Atlas / 2000 - Pool Equipment Room

Purpose

This corrected record treats the property as having one pool. The indoor pool is the Pool. Pool Equipment Room records cover filtration, pumps, UV/ozone, Desert Aire pool HVAC/dehumidification, and hydronic pool heat. The standalone Sundance spa / hot tub is separate and excluded from this pool record.

Pool Water Treatment Chain

Step	Equipment / Area	Notes
1	Pool source	Water leaves the pool and enters the equipment chain.
2	Pentair 3.0 HP Pool Pump	Primary circulation pump for pool water.
3	Triton II Sand Filter	Filter pressure and backwash history should be logged.
4	UltraPure / Paramount UV2 UV-Ozone	UV/ozone treatment before return to pool.
5	Return to Pool	Return line after treatment chain.

Related Atlas Assets

Asset	Location	Vendor / System
Pentair 3.0 HP Pool Pump	Pool Equipment Room	PSF Mechanical / Pentair
Triton II Sand Filter	Pool Equipment Room	PSF Mechanical / Triton II
UltraPure / Paramount UV2 UV-Ozone	Pool Equipment Room	PSF Mechanical / UltraPure
Pool Heat Transfer HX-1 / P-8	Pool Equipment Room	Hydronic pool heat transfer
Pool Water Loop P-9	Pool Equipment Room	Pool water circulation loop
Desert Aire DHU-1 Pool Dehumidification	Pool	Pool HVAC / dehumidification

Operating Notes

- Before moving any filter valve, confirm pump status and turn the pump off when required.
- Log filter pressure before and after backwash/rinse cycles.
- Photo leaks, abnormal sound, vibration, warning lights, or chemical-feed concerns.
- Keep Sundance Optima spa records separate from this pool-equipment record.
